# Tax Credits for Home Improvements

On February 17, 2009, President Obama signed into law the historic American Recovery and Reinvestment Act of 2009. As a result of this act, the federal government announced tax credits for consumers who purchase qualifying high-efficiency heating and cooling products for their homes.

Until December 31, 2010 certain high-efficiency HVAC products qualify for a tax credit equal to 30% of their installed cost, up to a maximum credit of \$1,500. Some restrictions apply.

Your tax advisor can help you determine how these credits may help you.

It's the perfect opportunity to upgrade your home with an energy-efficient heating and cooling system by Bryant plus get a major tax break too!
